

January

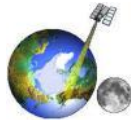

Dear Parents,
I Hope you had a relaxing holiday. I look forward to inspiring your child's mind some more and they likewise will inspire mine. Please let me know if there is a particular subject that your child would like to learn about. I will do my best to put together a lesson. Happy 2012. Anne Dahlin

3 Force and Gravity

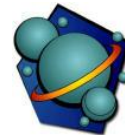

If it goes up it must come down. If you want it to move you must apply force. We'll prove that.

5 Earth & Moon

We'll discover some interesting facts about the earth and the moon. And how awesome both are.

10 Solar System

There used to be nine – now Pluto has been displaced. We'll talk about that and much more "spacey" things.

12 Science Games

It may seem like we're having way too much fun to call it science but it is. We'll focus on team work, review and much more. Come ready to have FUN

17 Volcanoes

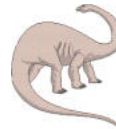

Beauty, mystery, destruction. We'll talk about why they occur and life after a volcano.

19 Geology

Deep from the earth precious gems and rocks can be found. It's all about the earth they were made in.

24 Dinosaurs

Everyone loves a dinosaur! The kids pretty much teach this class so; bring some dino facts to class for this fun filled day.

26 Science Fun

31 Kitchen Science - Paints

We'll be using all sorts of kitchen chemicals to make some terrific paints.
